LH-455 Elastomeric Yarn Feeder

Electric	110V-220VAC
Dimension	27.5 x 20 x 36.5cm (11 x 8 x 14in)
Weight	11.3Kg (25lb)

Lawson Hemphill Elastomeric Yarn Feeder, EYF is developed as positive yarn feeding device for the CTT-E instrument when testing elastomeric yarns for unwinding tension, elongation, draw ratio or pin friction.

The EYF is compact in size and it can be placed on the side or top of the CTT-E depending on testing needs. It can accommodate most standard elastomeric yarn packages.
